

# THE YANK

## ACTIVITY SHEET

**THE WORKSHOPS  
RAIL MUSEUM**

Trains were used to move wartime supplies and troops around Queensland during the Second World War. The Yank, otherwise known as Class AC16 221A was designed after a request was made for more trains in 1941. Queensland received twenty locomotives. One of these trains, No.221A, was used until 1970 when it was put into the Redbank Steam Locomotive Museum. This locomotive has now been restored and had its first test run on 12 May 2003.

### WHAT TO DO

- 1 Use the underlined words in the text to unjumble the mystery words
- 2 Find the mystery words in the wordsearch
