This program has been produced and published by The Workshops Rail Museum, North Street, North Ipswich, Qld, Australia 4305.

The Museum's Vision Statement is:

to be recognised as a creative, innovative and exciting journey of discovery into Australia's rail story.

The Mission Statement is:

to harness the significance of the Workshops precinct by delivering international standard cultural and tourism related activities, education and public programs associated with the interaction of rail on people's lives.

Education Programs produced by The Workshops Rail Museum whether in hard copy or accessed from the Museum's internet web site are able to be reproduced and used by educational and like institutions for educational purposes free of charge. Programs cannot be reproduced or used for commercial purposes in any form. All programs, their contents and their images remain the property of The Workshops Rail Museum or other therein acknowledged sources, and normal copyright laws apply.

Purpose and Overview

The following activities are based on different Zones around The Workshops Rail Museum and are aimed at helping students to achieve the outcomes described in the Sugarcane, Cattle and Coal Education Program.

The activities require students to use a range of thinking skills in identifying the various answers to questions, and completing the activities below.

These activities are stepping stones to further study and acquisition of knowledge. Teachers should encourage students to explore further the answers to the various questions.

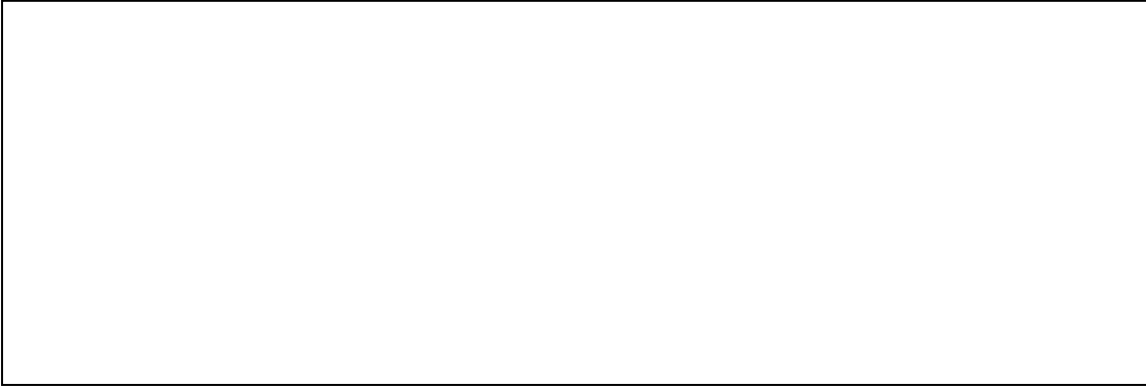

Below is a map of The Workshops Rail Museum. You can refer to this map to help orientate yourself throughout the trail activities.

Zone 3 Moving Goods

The Moving Goods Zone contains examples of the types of wagons used to haul goods in Queensland. In the space below, sketch the required wagons and provide a brief description of the wagon.

Sheep Wagon

Coal Hopper

Zone 4 – Diesel Revolution

Evaluate the short and long-term effects that the introduction of diesel had on Queensland. Consider the local, state and national impacts.

Introduction of Diesel Engines

	Locally	Queensland	Australia
Short Term Effects			
Long Term Effects			

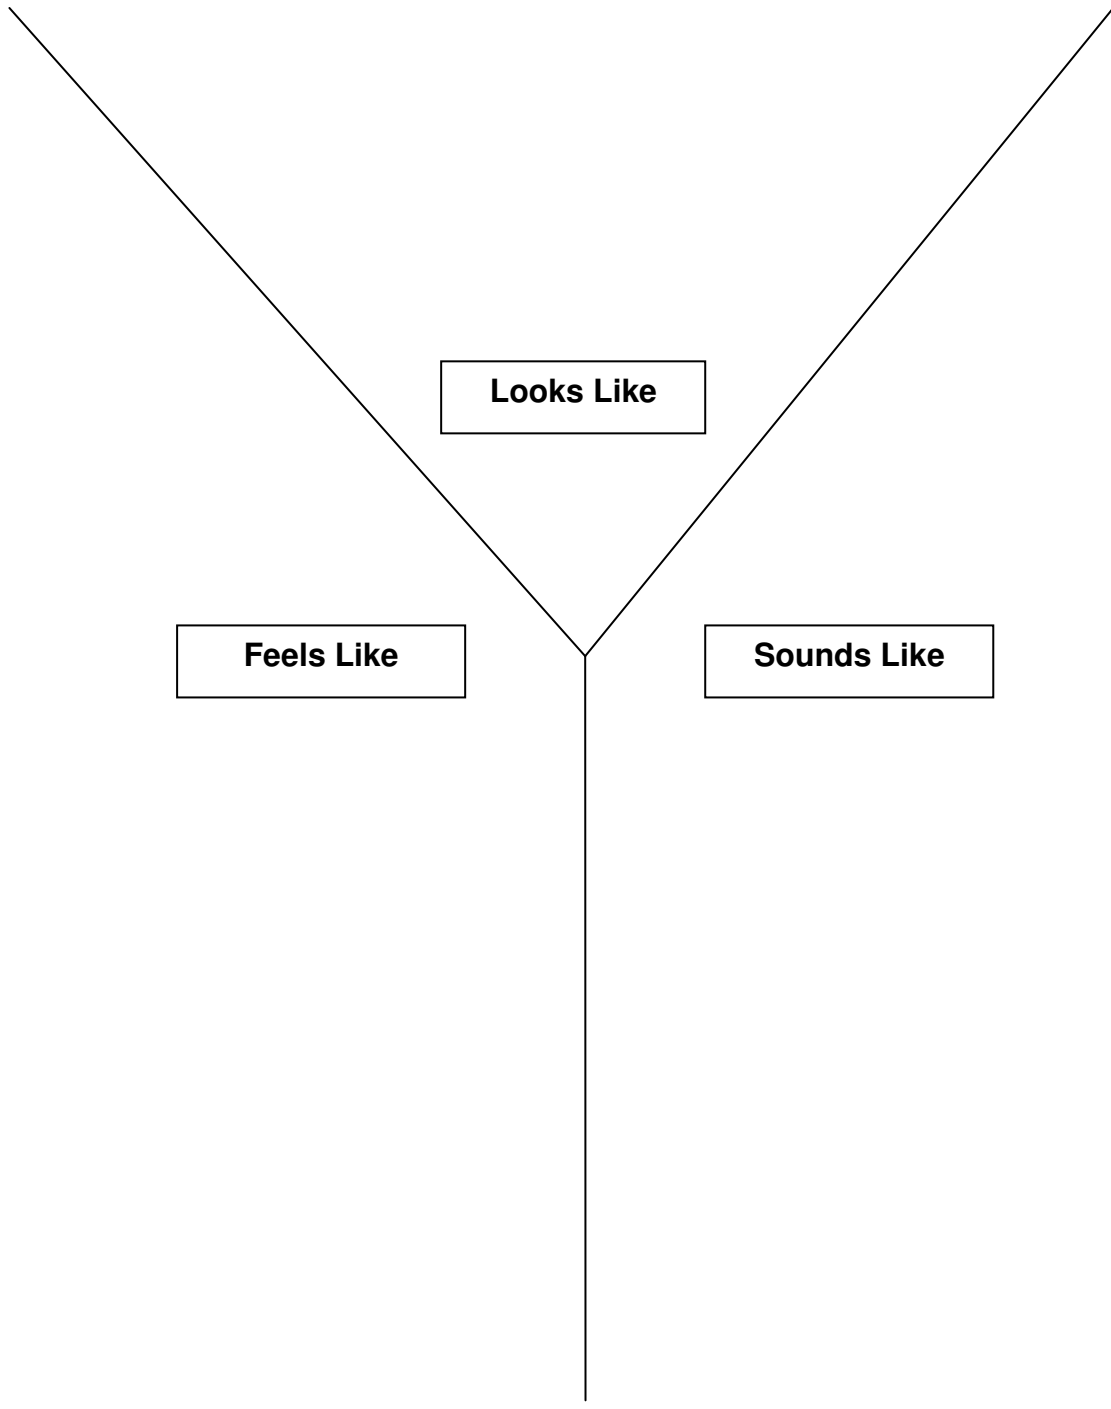

Zone 6 - Model Railway

The Model Railway depicts many of the different roles that rail plays in Queensland. Observe the model railway and identify the different industries that rail caters to. List those industries in the table below and provide a brief description of each section of the model rail.

Industry	Description

Zone 8 – Rail in Queensland

In Zone 8 *Rail in Queensland*, there is an account of the Grand Opening of Queensland's first line. Fill in the Y chart below describing how you imagine it looked, sounded and felt.

Looks Like

Sounds Like

Zone 14 – Other Railways

Cane railways are mostly privately owned. In a table, list the positive and negative aspects of privately owned rail.

Positives	Negatives

In the space below sketch the Whole Stick Wagon and provide a brief description of the wagon.
